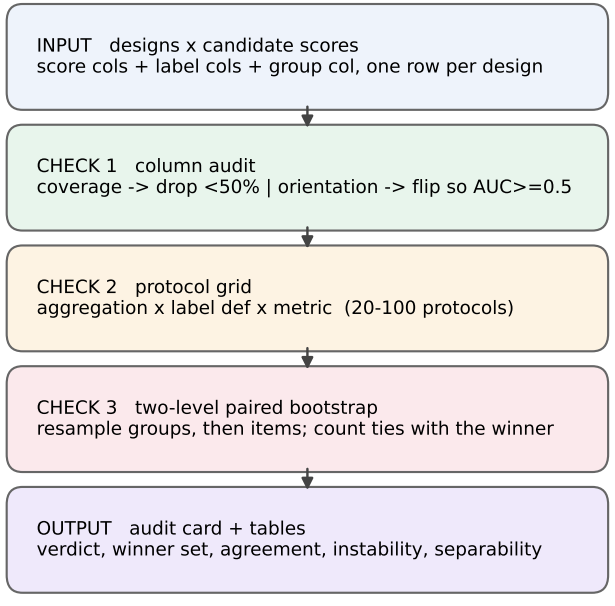
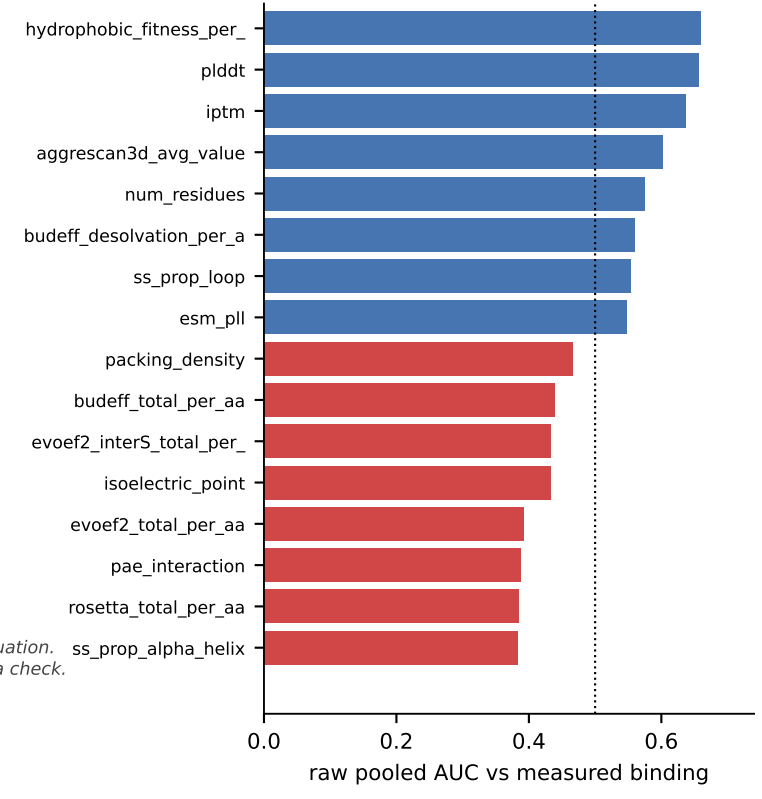
F14 The protocol-audit toolkit, shown on the prospective EGFR table

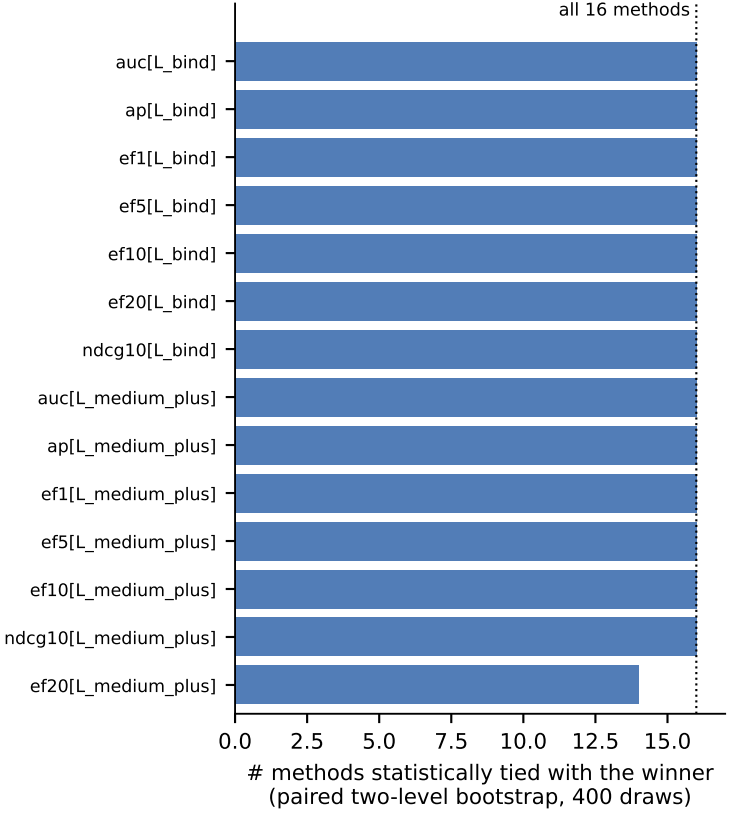
F14a protocol_audit: three checks that leaderboards routinely skip



PoseBusters checks the prediction; protocol_audit checks the evaluation. Neither predicts anything; both refuse to return a number without a check.

F14b Check 1: orientation
Adaptyv EGFR r2, 16 descriptors





F14c Check 3: separability
378 designs / 53 positives -> nothing ranks
